

Statistics and Opinions Regarding The International Multi-Conference on Engineering and Technological Innovation: IMETI 2008, and its Collocated Conferences and Symposia

Conference Organizing Committee

Our objective in this document is to provide its reader with (1) some statistics that were included in the forewords of the conferences proceedings, and (2) numbers and comments related to the online survey which all attendees were asked to fill right after the conferences were over.

Statistics

As it was written in the forward of the proceedings, 454 submissions were received for IMETI 2008, which were sent to 880 scholars, researchers and professionals for their respective reviews. These reviewers made 1949 reviews; which mean an average of 4.29 reviews per submission, and 2.1 reviews per reviewer. The 141 papers included the IMETI 2008 proceedings were all based on these reviews.

The following table shows these statistics for IMETI 2008 and its collocated conferences.

Conference	# of submissions received	# of reviewers assigned	# of reviews made	Average of reviews per reviewer	Average of Reviews per submission	# of papers included in the proceedings	% of submissions included in the proceedings

Opinions

Right after the collocated conferences were over, all attendees were surveyed. 872 visited the survey web form and 602 filled it. To the following question "Could you please grade the conference's organizational process of the conference from 1 to 10?" they answered with an average of 8.42 on a scale of 10. 112 scholars rated the conference at the maximum of 10, 134 rated it at 9, and 107 at 8. This means that 58.7% rated the 2008 collocated conferences in the range of 8-10 on a scale of 10. Just 7 (1.16%) attendees rated it below 5 on a scale of 10. More details regarding this question and others can be found in the following tables.

The following listing has been elaborated via copy and paste (with no proofreading or editing) from comments made by conferences' attendees to the online survey they filled after the conferences were over.

A complete list of the answers is given in Appendix A. Some comments are in Spanish or Portuguese because one of the collocated conferences was an Ibero-American one; which papers and presentations were made in Spanish or Portuguese.

- I think the conference was well organized and the quality of the papers was excellent
- The conference was overall excellent.
- Excellent Conference
- A wide range of subjects were covered which expanded the horizons of young investigators allowing exchange of cross disciplinary scientific and technological concepts and ideas. A great conference overall.
- the received papers had a good level it had quality deepness good presentation etc
- I find the papers published in the proceedings are good.
- The quality of the papers was very good (*La calidad de las ponencias fue muy buena Quality of papers is better than before.*)
- So many things! The multi- and inter-disciplinarity of the conference is what I like best to be able to come to the conference to talk about my own topic but know that I can attend sessions on all kinds of related and sometimes only closely-related topics and occasionally seemingly unrelated topics (Knot Theory!) and learn so much from everyone! It is exciting to meet scholars from all over the world; this conference is truly international. It is very well organized. Things start and end on time (okay there was that extra wait for the awards ceremony but during it I got to have a great conversation with a scholar from Britain!). Breaks are well planned with nice surprises (Haagen Das ice cream for heavens sake!). I am always made to feel that my contribution is valued. All the organizational staff are most friendly and helpful. I could go on.

appreciated very much the general talks and sessions because they meant an excellent opportunity to meet all the people in the conference.

- Great organization well defined sessions
- The system of articles reviewing is the best I have ever seen (*El sistema de revisión de los artículos es de lo mejor que he visto.*)
- Invited sessions tend to attract some of the best researchers from international arena who would not otherwise participate in such general conferences. Thus the prestige of WMSCI is significantly enhanced.

Appendix A

Could you please inform us about the good things you found in the conference so we can keep them or even improve them?

Perhaps more focus in the sessions by being more selective in their grouping and ranking. Sessions should be labelled such that the group of papers presented have more synergetic value. For example Academic Globalization could have had a subtheme titled "International Master Programmes" That would have given more focus on the main idea of the papers presented.

Great organization well defined sessions

The Awards Ceremony on Wednesday evening. Best Paper Awards for each session. Best Papers sent to JSCI for review for Journal publication.

Cena de gala del primer día como eje para conocer personas.	
Invited sessions tend to attract some of the best researchers from international arena who would not otherwise participate in such general conferences. Thus the prestige of WMSCI is significantly enhanced.May the keynote and a luncheon speakers should be chosen to appeal to a wider sector of conference participant. Usually futuristic look at technology has a greater appeal than those of the more generic social sciences. Just a thought.	
In my opinion the development of this conference was really useful for integration of different topics related to the advances in the different fields of technology science and engineering from a integrating perspective in combination with specific sessions for particular topics of major interest for participants.

Son muchos los aspectos que desde mi punto de vista han sido favorables en la organización de la conferencia. Si bien destacar la posibilidad de poder elegir entre diversos idiomas para el envío y exposición de las comunicaciones separando sesiones con exposición en lengua inglesa y otras en habla hispana. Destacar el carácter multidisciplinal del congreso. Y finalmente comentar que todas las dudas que he tenido durante el proceso de envío y de revisión del trabajo así como durante el proceso posterior me han sido rápida y eficazmente resueltas.

The dissemination of all thesis submitted to WSIIS by CDs is a very usefull thing.	
The conf. was well organised and some pick up arrangements from the airport would have been advisable.	
Excellent participation percentage. Only few sessions had no shows.	
good schedule good secretary services good reviewers good hotel	
The venue- Rosen Hotel - is an excellent place and the surrounding areas entertainment value is out of this world and is the main reason I am returning in 2009 (with my family this time). I would not advise a significant change to the venue.	
The location of Orlando is good as it offeres a variety of interesting things to do.The conference venue was good and offered a good value for conference attendees (in terms of lodging). Also the venue provides a lot of other smaller venues for different presentations to take place under one roof.	
Good General Joint Plenary Session with Plated Breakfast	

Las instalaciones fueron excelentes. Las personas de inscripción (excepto la de la fila para los no inscritos o aclaraciones especiales) fueron muy amables y atentas. La atención por correo electrónico antes y después del evento es excelente.

I appreciated the variety of papers and researchers--it was interesting to talk with academics technicians management etc. The posting of the papers before hand and the opportunity to get an overview of all of the papers was fabulous as I was a co-chair for the session. I spent some time drawing the papers together in terms of concepts and results. Of course there were people who did not get their papers posted in time and no one did make comments on -line but the opportunity was there.

Good location in hotel keep it as it is

A wide range of subjects were covered which expanded the horizons of young investigators allowing exchange of cross disciplinary scientific and technological concepts and ideas. A great conference overall.

The combination of the conferences was good as you have a wide cross section of sessions to choose from as well as to attend.

The program is well organized.

Very well organized beautiful location excellent programme.

Variety of topics and colleagues. It is nice to meet experts from different areas and countries.

It was good to keep papers of similar paper topics in the same session. The best paper selection should be decided among the paper presenter in each session and not the attendance.

The diversity of events occurring in the same space the Spanish language in some sessions (some people used Portuguese too despite the difficult to Spanish speakers understand Portuguese..) the good and multicultural atmosphere of the event and the friendliness of the participants.

The opportunity to meet and discuss with others from around the world was much appreciated

I was impressed that the conference did not appear to be heavily skewed by US academics even though it was held in Orlando. This was quite refreshing as other International conferences Ive attended in the US tend to have the majority of attendees from the US. Our diversity in countries offers a wonderful opportunity to learn from a variety of approaches and thought. Thank you!

Good Organization good even timing

The organization of our Conference is perfect. Special thanks to the youngest girl (Sorry I do not know her name).

- Really interesting key note speakers- Breakfast with all participants- Gala dinner on the first day- Some sessions and papers- Interesting talks during the breaks- Very good organisation of so many participations

- the multiplicity of parallel sessions and the broad range of topics- the excellent place where the conference was held- the conferences strong organization- the high

involvement of the participants as reviewers/co-chairs in the feedback process etc.

One of the good things of the conference is to select good papers to be published in JSCI. However if JSCI is indexed in some established databases it will be an added advantage to participant and organizer.
